

Elisa Microplate Reader INS28-CA-2000

Immunospec INS28-CA-2000 is a microplate reader system that has an 8-channel optic fiber system, for standard microplates with 96 wells. It can use single and double filter wavelength and can display and print OD value with three decimals. With the IMMUNOSPEC microplate reader system it is possible to program different tests, setup the plate to read and chose different ways for the printout with internal thermal printer. The RS232 port allows to send results on an external computer.
